

Newsletter 2

May 2020

Dear colleagues,

Linkommunity partners were engaged in the previous month in the selection of good practices that they wanted to share with their colleagues from other countries, in order to develop the Linkommunity Model for the intervention with students, teachers, social operators and families in the involved countries

The objectives of the exchange of existing good practices are:

- ⊙ strengthen the **role of the school and all the actors in the educational process**;
- ⊙ promote **active involvement of families** in educational services in the area;
- ⊙ develop the sense of **re-appropriation of common spaces, citizenship and legality** of children to overcome the risk of marginality;
- ⊙ promote the **cognitive skills (STEM), relational skills and creative thinking** of children to overcome the risk of marginality.

The final product of this action is available now in the project website www.linkommunity.eu in the RESOURCES section.

During the second staff mobility hosted in Italy Sinergia staff introduced some working methodologies with the project target groups:

- Non formal education
- Gamification
- Theatre
- Digital Storytelling

A great opportunity to plan the local activities using new approaches!
